Statement of intent

At John Mayne CE Primary School, we understand that pupils must be provided with an education that prepares them for the opportunities, responsibilities and experiences of adult life. A key part of this relates to relationships education, which must be delivered to every primary-aged pupil. Primary schools also have the option to decide whether pupils are taught sex education. State-funded primary schools are also required to teach health education.

Relationships education focusses on giving pupils the knowledge they need to make informed decisions about their wellbeing, health and relationships, and to build their self-efficacy. Health education focusses on equipping pupils with the knowledge they need to make good decisions about their own health and wellbeing.

We understand our responsibility to deliver a high-quality, age-appropriate and evidence-based relationships, sex and health curriculum for all our pupils. This policy sets out the framework for our relationships, sex and health curriculum, providing clarity on how it is informed, organised and delivered.

Introduction

All pupils at John Mayne CEP School are afforded a sense of their own dignity and a vision of the innate dignity of all humankind. Every child at our school is both revered and respected as a member of our community where all are known and loved by God.

The focus in primary school should be on teaching the fundamental building blocks and characteristics of positive relationships, with particular reference to friendships, family relationships, and relationships with other children and with adults.

The teaching of Relationship and Sex Education at John Mayne CEP School, using an integrated and consistent approach, is an important aspect of pupils' education. Relationship and Sex Education includes supporting young people in developing self-confidence in preparing for physical and emotional changes into adulthood. We believe that the teaching of Relationship and Sex Education should be shared with parents and be mutually supportive and complementary. It promotes an understanding of the range of family types and other people who contribute to providing children with the care, love and support they need to grow and develop,

In this policy, Relationship and Sex Education relates to 'learning about physical, moral and emotional development.' It is about understanding the importance of family life, stable and loving relationships, respect, love and care and promoting the British value of tolerance. We do not use Relationship and Sex Education as a means of promoting any form of sexual orientation.

The policy has been developed to ensure that staff and parents or carers are clear about the statutory requirements regarding Relationships and Sex Education, and that the pupils receive their educational entitlement. Through implementation of this policy, the school will meet specific aspects of the legal and statutory requirements.

Every child is *entitled* to receive Relationships and Sex Education, it is not all statutory. It

is our intention that all children have the opportunity to experience a programme of Relationships and Sex Education at a level which is appropriate for their age and physical development with differentiated provision if required.

The Moral and Values Framework

Relationships and Sex Education is required to be taught within a moral framework. Children will learn about moral values through all aspects of school life and in all curriculum areas, not just in Relationships and Sex Education.

We aim to:

- help pupils develop sensitivity and respect for themselves and others;
- provide a friendly and caring environment in which children are able to ask questions and further their understanding;
- support pupils in taking responsibility for their actions and the consequences of their actions;
- provide equality of opportunity for all children in a caring community in which each individual is encouraged to make a valuable contribution.

Aims of Relationship and Sex Education

Taking account of the age, maturity and needs of the pupils, Relationships and Sex Education aims to:

- provide the knowledge and information to which all pupils are entitled;
- understand the law and the age of consent
- help children to develop feelings of self-respect, self-esteem, self-confidence, sympathy and empathy;
- provide the confidence to be participating members of society and to value themselves and others;
- prepare pupils for puberty and encourage them to take responsibility for their own actions;
- give them an understanding of reproduction and sexual development;
- give them an understanding of the importance of health and hygiene;
- develop and use communication skills and assertiveness skills to cope with the influences of their peers and the media, including whilst they are online.
- respect and care for their bodies;
- answer pupils' questions honestly and sensitively – referring the children to parents where appropriate;
- give them information on where individuals and families can get help and support including for emotional, physical and sexual abuse.

Context

We teach Relationships and Sex Education in the context of our aims and values and we teach Relationships and Sex Education with the beliefs that:

- RSE should be taught in the context of loving relationships and family life;
- RSE is part of a wider personal, social, spiritual and moral education process;
- children should be taught to have respect for their own bodies;

- children should learn about their responsibilities to others, and be aware of the consequences of sexual activity;
- it is important to build positive relationships with others, involving trust and respect;
- children need to learn the importance of self-control.

Teaching and Learning including Delivery of the Curriculum

Every primary school is required to deliver statutory relationships education and health education. The delivery of the relationships education and of health education coincide with one another and will be delivered as part of the school's PSHE curriculum.

For the purpose of this policy:

- "Relationships and sex education" is defined as teaching pupils about healthy, respectful relationships, focussing on family and friendships, in all contexts, including online, as well as developing an understanding of human sexuality.
- "Health education" is defined as teaching pupils about physical health and mental wellbeing, focussing on recognising the link between the two and being able to make healthy lifestyle choices.

The relationships and health curriculum has been organised in line with the statutory requirements outlined in the DfE (2019) 'Relationships, Education, Relationships and Sex Education (RSE) and Health Education' guidance.

The relationships and health curriculum takes into account the views of teachers, pupils and parents. The school has organised a curriculum that is appropriate for the age and developmental stages of pupils within each year group. When organising the curriculum, the religious backgrounds of all pupils will be considered, so that the topics that are covered are taught appropriately.

We teach Relationships and Sex Education discretely. However, some relationship aspects are covered through our values curriculum, and some of the biological aspects are covered in Science.

There is a separate Sex Education curriculum which is taught outside of the Science and PSHE curriculum which should be read in conjunction with the policy. This outlines specifically how the subject is taught for each year groups under the specific heading of:

For KS1 children:

- Me and my body
- Relationships with others
- Feelings and emotions
- Lifecycle and reproduction
- On-line safety
- There is also a list of the vocabulary we will use for each year group

For KS2 pupils:

- Physical changes
- Emotions and feelings
- Relationships
- Menstruation (Y5 and Y6 only)
- Personal rights and responsibilities
- On-line safety
- There is also a list of the vocabulary we will use for each year group

We also teach Relationships and Sex Education through other subject areas (for example Science and PE) where we feel that they contribute significantly to a child's knowledge and understanding of his or her own body, and how it is changing and developing.

Linked with R.E, children reflect on family relationships, different family groups and friendship, children learn about rituals and traditions associated with birth, marriage and death and talk about the emotions involved.

Since Relationships and Sex Education incorporates the development of self-esteem and relationships, pupils' learning does not just take place through the taught curriculum, but through all aspects of school life including the playground. It is important then that all staff understand that they have a responsibility to implement this policy and promote the aims of the school at any time they are dealing with children.

The Role of Parents

The school is well aware that the primary role in children's Relationships and Sex Education lies with parents and carers. All parents have the right to remove their child from any or all Sex Education lessons which we respect. Lessons will be taught from the Spring Term onwards and parents will be informed of this so if they wish to remove their child, they are able to do so. We wish to build a positive and supporting relationship with the parents of children at our school through mutual understanding, trust and co-operation. In promoting this objective we:

- will inform parents about the school's Relationships and Sex Education policy and practice;
- will answer any questions that parents may have about the Relationships and Sex Education of their child;
- will take seriously any issue that parents raise with teachers or governors about this policy or the arrangements for Relationships and Sex Education in the school.

The Role of the Headteacher

It is the responsibility of the Headteacher to ensure that both staff and parents are informed about our Relationships and Sex Education policy, and that the policy is implemented effectively. It is also the Headteacher's responsibility to ensure that members of staff are given sufficient training, so that they can teach effectively and handle any difficult issues with sensitivity. The Headteacher monitors this policy on a regular basis and reports to governors on the effectiveness of the policy. The Headteacher will also ensure that reviews of the policy and the RSE curriculum includes all stakeholders including parents.

The Role of the School and Other Members of the Community

We encourage other valued members of the community to work with us to provide advice and support to the children with regard to health education. Health professionals are expected to work within the school's Relationships and Sex Education policy and on the instructions of the Headteacher.

Confidentiality

Teachers conduct Relationships and Sex Education lessons in a sensitive manner and in confidence. However, if a child makes a reference to being involved, or likely to be involved in sexual activity, or indicates that they may have been a victim of abuse, this will be dealt with in line with our child protection policy.

Answering Difficult Questions

If a child asks an explicit or difficult question, the staff will use their professional judgement in deciding the best way to answer it. This may be through individual work or discussion with the child. If the staff member is concerned, they can refer to the Headteacher who can discuss the matter with the parent, or follow other appropriate procedures.

Procedures for Withdrawal of Pupils

The government guide for parents – "Understanding Relationships and Health Education in your child's school: primary", states that:

"You cannot withdraw your child from Relationships Education because it is important that all children receive this content, covering topics such as friendships and how to stay safe. Your child's primary school can choose to teach Sex Education. If you'd like to know more about this, we recommend speaking to the school to understand what will be taught and when. If you do not want your child to take part in some or all of the lessons on Sex Education, you can ask that they are withdrawn. At primary level, the head teacher must grant this request. The science curriculum in all maintained schools also includes content on human development, including reproduction, which there is no right to withdraw from."

Children with Special Educational Needs

It is up to the school to make sure that the needs of all pupils are met. This may mean more explicit teaching to ensure that children with additional education needs are properly

included in RSE. This may mean additional support within lessons, small group or individual lessons and an adapting of resources to enable access. Parents may need to be consulted individually with regard to children with SEN.

Monitoring and Evaluating the Policy

Teacher assessment will inform discussion about the successful implementation of the policy. Judgements about the success of the policy can also be made through gathering evidence from school staff about how the policy supports them, from parents and governors about the clarity of the information provided, and from pupils about how Sex Education provision is meeting their needs.

Roles and responsibilities

The governing board is responsible for:

- Ensuring all pupils make progress in achieving the expected educational outcomes.
- Ensuring the curriculum is well led, effectively managed and well planned.
- Evaluating the quality of provision through regular and effective self-evaluation.
- Ensuring teaching is delivered in ways that are accessible to all pupils with SEND.
- Providing clear information for parents on subject content and their rights to request that their children are withdrawn.
- Making sure the subjects are resourced, staffed and timetabled in a way that ensures the school can fulfil its legal obligations.
- Ensuring the religious ethos of the school is maintained and developed through the subjects.

The headteacher is responsible for:

- The overall implementation of this policy.
- Ensuring staff are suitably trained to deliver the subjects.
- Ensuring that parents are fully informed of this policy.
- Reviewing requests from parents to withdraw their children from the subjects.
- Discussing requests for withdrawal with parents.
- Organising alternative education for pupils, where necessary, that is appropriate and purposeful.
- Reporting to the governing board on the effectiveness of this policy.
- Reviewing this policy on a bi-annual basis.

Teachers are responsible for:

- Delivering a high-quality and age-appropriate relationships, sex and health curriculum in line with statutory requirements.
- Using a variety of teaching methods and resources to provide an engaging curriculum that meets the needs of all pupils.
- Ensuring they do not express personal views or beliefs when delivering the programme.
- Modelling positive attitudes to relationships, sex and health education.
- Responding to any safeguarding concerns in line with the Child Protection and Safeguarding Policy.
- Acting in accordance with planning, monitoring and assessment requirements for the subjects.
- Liaising with the SENCO to identify and respond to individual needs of pupils with SEND.
- Working with the relationships, sex and health education subject leader to evaluate the quality of provision.

The SENCO is responsible for:

- Advising teaching staff how best to identify and support pupils' individual needs.
- Advising staff on the use of TAs in order to meet pupils' individual needs.

Consultation with parents

The school understands the important role parents play in enhancing their children's understanding of relationships, sex and health. Similarly, we also understand how important parents' views are in shaping the curriculum. The school works closely with parents by establishing open communication – all parents are consulted in the development and delivery of the curriculum.

Parents are provided with the following information:

- The content of the relationships, sex and health curriculum
- The delivery of the relationships, sex and health curriculum, including what is taught in each year group
- The legalities surrounding withdrawing their child from the subjects
- The resources that will be used to support the curriculum

The school aims to build positive relationships with parents by consulting with them what will be taught, address any concerns and help parents in managing conversations with their children on the issues covered by the curriculum. Parents are consulted in the review of the curriculum and this policy, and are encouraged to provide their views at any time.

Relationships education overview

Families and people who care for me

By the end of primary school, pupils will know:

- That families are important for them growing up because they can give love, security and stability.
- The characteristics of healthy family life, commitment to each other, including in times of difficulty, protection and care for children and other family members, the importance of spending time together and sharing each other's lives.
- That others' families, either in school or in the wider world, sometimes look different from their family, but that they should respect those differences and know that other children's families are also characterised by love and care.
- That stable, caring relationships, which may be of different types, are at the heart of happy families, and are important for children's security as they grow up.
- That marriage represents a formal and legally recognised commitment of two people to each other which is intended to be lifelong.
- How to recognise if family relationships are making them feel unhappy or unsafe, and how to seek help or advice from others if needed.

Caring friendships

By the end of primary school, pupils will know:

- How important friendships are in making us feel happy and secure, and how people choose and make friends.
- The characteristics of friendships, including mutual respect, truthfulness, trustworthiness, loyalty, kindness, generosity, trust, sharing interests and experiences, and support with problems and difficulties.
- That healthy friendships are positive and welcoming towards others, and do not make others feel lonely or excluded.
- That most friendships have ups and downs, but that these can often be worked through so that the friendship is repaired or even strengthened, and that resorting to violence is never right.
- How to recognise who to trust and who not to trust.
- How to judge when a friendship is making them feel unhappy or uncomfortable.
- How to manage conflict.
- How to manage different situations and how to seek help from others if needed.

Respectful relationships

By the end of primary school, pupils will know:

- The importance of respecting others, even when they are very different from them (for example, physically, in character, personality or backgrounds), make different choices, or have different preferences or beliefs.
- Which practical steps they can take in a range of different contexts to improve or support respectful relationships.
- The conventions of courtesy and manners.
- The importance of self-respect and how this links to their own happiness.
- That in school and wider society they can expect to be treated with respect by others, and that in turn they should show due respect to others, including those in positions of authority.
- About the different types of bullying (including cyberbullying), the impact of bullying, responsibilities of bystanders to report bullying to an adult, and how to seek help.
- What a stereotype is, and how they can be unfair, negative or destructive.
- The importance of permission-seeking and giving in relationships with friends, peers and adults.

Online relationships

By the end of primary school, pupils will know:

- That people sometimes behave differently online, including pretending to be someone they are not.
- That the same principles apply to online relationships as to face-to-face relationships, including the importance of respect for others online, even when we are anonymous.
- The rules and principles for keeping safe online.
- How to recognise harmful content and contact online, and how to report these.
- How to critically consider their online friendships and sources of information.
- The risks associated with people they have never met.
- How information and data is shared and used online.

Being safe

By the end of primary school, pupils will know:

- What sorts of boundaries are appropriate in friendships with peers and others – including in a digital context.
- About the concept of privacy and the implications of it for both children and adults.
- That it is not always right to keep secrets if they relate to being safe.

- That each person's body belongs to them, and the differences between appropriate and inappropriate or unsafe physical, and other, contact.
- How to respond safely and appropriately to adults they may encounter, including online, who they do not know.
- How to recognise and report feelings of being unsafe or feeling bad about any adult.
- How to ask for advice or help for themselves and others, and to keep trying until they are heard.
- How to report concerns or abuse, and the vocabulary and confidence needed to do so.
- Where to seek advice, for example, from their family, their school and other sources.

Health education overview

The focus at primary level is teaching the characteristics of good physical health and mental wellbeing.

Mental wellbeing

By the end of primary school pupils will know:

- That mental wellbeing is a normal part of daily life, in the same way as physical health.
- That there is a normal range of emotions, e.g. happiness, sadness, anger, fear, surprise and nervousness.
- The scale of emotions that humans experience in response to different experiences and situations.
- How to recognise and talk about their emotions, including having a varied vocabulary of words to use when talking about their own and others' feelings. Provide opportunities for pupils with reduced language skills to draw how they are feeling.
- How to judge whether what they are feeling and how they are behaving are appropriate and proportionate.
- The benefits of physical exercise, time outdoors, community participation, and voluntary and service-based activity on mental wellbeing and happiness.
- Simple self-care techniques, including the importance of rest, time spent with friends and family, and the benefits of hobbies and interests.
- How isolation and loneliness can affect children, and that it is very important they seek support and discuss their feelings with an adult.
- That bullying (including cyberbullying) has a negative and often lasting impact on mental wellbeing.
- Where and how to seek support (including recognising the triggers for seeking support), extending to who in school they should speak to if they are worried about themselves or others.

- That it is common to experience mental ill health and, for the many people who do, the problems can be resolved if the right support is made available, especially if accessed early enough.

Internet safety and harms

By the end of primary school, pupils will know:

- That for most people, the internet is an integral part of life and has many benefits.
- About the benefits of rationing time spent online.
- The risks of excessive time spent on electronic devices.
- The impact of positive and negative content online on their own and others' mental and physical wellbeing.
- How to consider the effect of their online actions on others.
- How to recognise and display respectful behaviour online.
- The importance of keeping personal information private.
- Why some social media, some computer games and online gaming are age-restricted.
- That the internet can also be a negative place where online abuse, trolling, bullying and harassment can take place, which can have a negative impact on mental health.
- How to be a discerning consumer of information online, including understanding that information, inclusive of that from search engines, is ranked, selected and targeted.
- Where and how to report concerns and get support with issues online.

Physical health and fitness

By the end of primary school, pupils will know:

- The characteristics and mental and physical benefits of an active lifestyle.
- The importance of building regular exercise into daily and weekly routines and how to achieve this, for example by walking or cycling to school, a daily active mile, or other forms of regular, vigorous exercise.
- The risks associated with an inactive lifestyle, including obesity.
- How and when to seek support, including which adults to speak to in school, if they are worried about their health.

Healthy eating

By the end of primary school, pupils will know:

- What constitutes a healthy diet, including an understanding of calories and other nutritional content.
- The principles of planning and preparing a range of healthy meals.

- The characteristics of a poor diet and risks associated with unhealthy eating, including obesity, and other behaviours, e.g. the impact of alcohol on health.

Drugs, alcohol and tobacco

By the end of primary school, pupils will know the facts about legal and illegal harmful substances and associated risks, including smoking, alcohol use and drug-taking.

Health and prevention

By the end of primary school, pupils will know:

- How to recognise early signs of physical illness, such as weight loss or unexplained changes to the body.
- About safe and unsafe exposure to the sun, and how to reduce the risk of sun damage, including skin cancer.
- The importance of sufficient good-quality sleep for good health, and that a lack of sleep can affect weight, mood and ability to learn.
- About dental health and the benefits of good oral hygiene and dental flossing, including regular check-ups at the dentist.
- About personal hygiene and germs, including bacteria and viruses, how they are spread and treated, and the importance of hand washing.
- The facts and science relating to immunisation and vaccination.

Basic first aid

By the end of primary school, pupils will know:

- How to make a clear and efficient call to emergency services if necessary.
- Concepts of basic first-aid, for example dealing with common injuries, including head injuries.

Changing adolescent body

By the end of primary school, pupils will know:

- Key facts about puberty and the changing adolescent body, particularly from age 9 through to age 11, including physical and emotional changes.
- About menstrual wellbeing and key facts relating to the menstrual cycle.

Sex education

Although it is not statutory to deliver sex education outside of the science curriculum at primary level, the DfE recommends that all primary schools should have a sex education programme in place. This should be tailored to the age, and physical and emotional maturity of pupils, and should ensure that boys and girls are prepared for the changes that adolescence brings, drawing on knowledge of the human life cycle.

All pupils must be taught the aspects of sex education outlined in the primary science curriculum – this includes teaching about the main external parts of the human body, how it changes as it grows from birth to old age, including puberty, and the reproductive process in some plants and animals.

The school is free to determine whether pupils should be taught sex education beyond what is required of the national curriculum. At our school, we do teach pupils elements of sex education particularly puberty beyond what is required of the science curriculum.

Parents are consulted on the organisation and delivery of our sex education curriculum. Parents are given the opportunity to have input on what should be taught through sex education.

The age and development of pupils is always considered when delivering sex education.

Equality and accessibility

The school understands its responsibilities in relation to the Equality Act 2010, specifically that it must not unlawfully discriminate against any pupil, parent/carer or staff member because of their protected characteristics. These include:

- Age
- Sex or sexual orientation
- Race
- Disability
- Religion or belief
- Gender reassignment
- Pregnancy or maternity
- Marriage or civil partnership

The school is committed to making reasonable adjustments wherever possible to promote accessibility and inclusivity of the curriculum. The school understands that pupils with SEND or other needs, such as those with social, emotional or mental health needs, are entitled to learn about relationships, sex and health education, and the programme will be designed to be inclusive of all pupils.

Teachers will understand that they may need to be more explicit and adapt their planning of work and teaching methods in order to appropriately deliver the programme to pupils with SEND or other needs.

Provisions under the Equality Act 2010 allow our school to take positive action, where it can be evidenced to be proportionate, to respond to particular disadvantages affecting a group because of a protected characteristic. For example, we could consider taking positive action to support girls if there was evidence that they were being disproportionately subjected to sexual violence or sexual harassment.

When deciding whether support is necessary to support pupils with a particular protected characteristic, we will consider our pupils' needs, including the gender and age range of our pupils.

In order to foster healthy and respectful peer-to-peer communication and behaviour between all pupils, the school implements a robust Behavioural Policy, as well as a Child Protection and Safeguarding Policy, which set out expectations of pupils.

The school understands that relationships, sex, and health education may include topics which are triggers for teaching staff, and could relate to historic, recent, or current trauma. If this is the case, the school encourages staff to approach their line manager or the school's designated wellbeing lead to discuss this.

Curriculum links

The school seeks opportunities to draw links between relationships, sex and health education and other curriculum subjects wherever possible to enhance pupils' learning. Relationships, sex and health education will be linked to the following subjects in particular:

- **Science** – pupils learn about the main external parts of the body and changes to the body as it grows from birth to old age, including puberty.
- **Computing and ICT** – pupils learn about e-safety, including how to use technology safely, responsibly, respectfully and securely, how to keep personal information private and how to access help and support.
- **PE** – pupils explore various physical activities, are physically active for sustained periods of time, engage in competitive sport and understand how exercise can lead to healthier lifestyles.
- **Citizenship** – pupils learn about the requirements of the law, their responsibilities and the possible consequences of their actions.
- **PSHE** – pupils learn about respect and difference, values and characteristics of individuals.

Withdrawing from the subjects

Relationships and health education are statutory at primary and parents do not have the right to withdraw their child from the subjects.

As sex education is not statutory at primary level, other than what must be taught as part of the science curriculum, parents have the right to request to withdraw their child from all or part of the sex education curriculum.

The headteacher will automatically grant a parent's request to withdraw their child from sex education, other than the content that must be taught as part of the science curriculum; however, the headteacher will discuss the request with the parent and, if appropriate, their child, to ensure that their wishes are understood and to clarify the nature and purpose of the curriculum. The headteacher will discuss with the parent,

the benefits of receiving this important education and any adverse effects that withdrawal may have on the pupil – this could include, for example, social and emotional effects of being excluded.

Monitoring and review

The governing board is responsible for approving this policy.

This policy will be reviewed on a bi-annual basis. The next scheduled review date for this policy is July 2027 This policy will also be reviewed in light of any changes to statutory guidance, feedback from parents, staff or pupils, and issues in the school or local area that may need addressing.

Any changes made to this policy will be communicated to all staff, parents and, where necessary, pupils.
